

**Stay Connected
To What Matters**

We Connect Your Team Effortlessly

Tango Tango is an affordable, full- featured communications service for public safety and business organizations. We integrate with any traditional land-mobile radio system, and provide a complete communications service that requires very low overhead and no capital expense.

Current State of Public Safety Communication

- Radio costs are expensive
- Coverage is limited
- Whole team is not connected
- Interoperability is difficult

Here Is How We Solve These Problems . . .

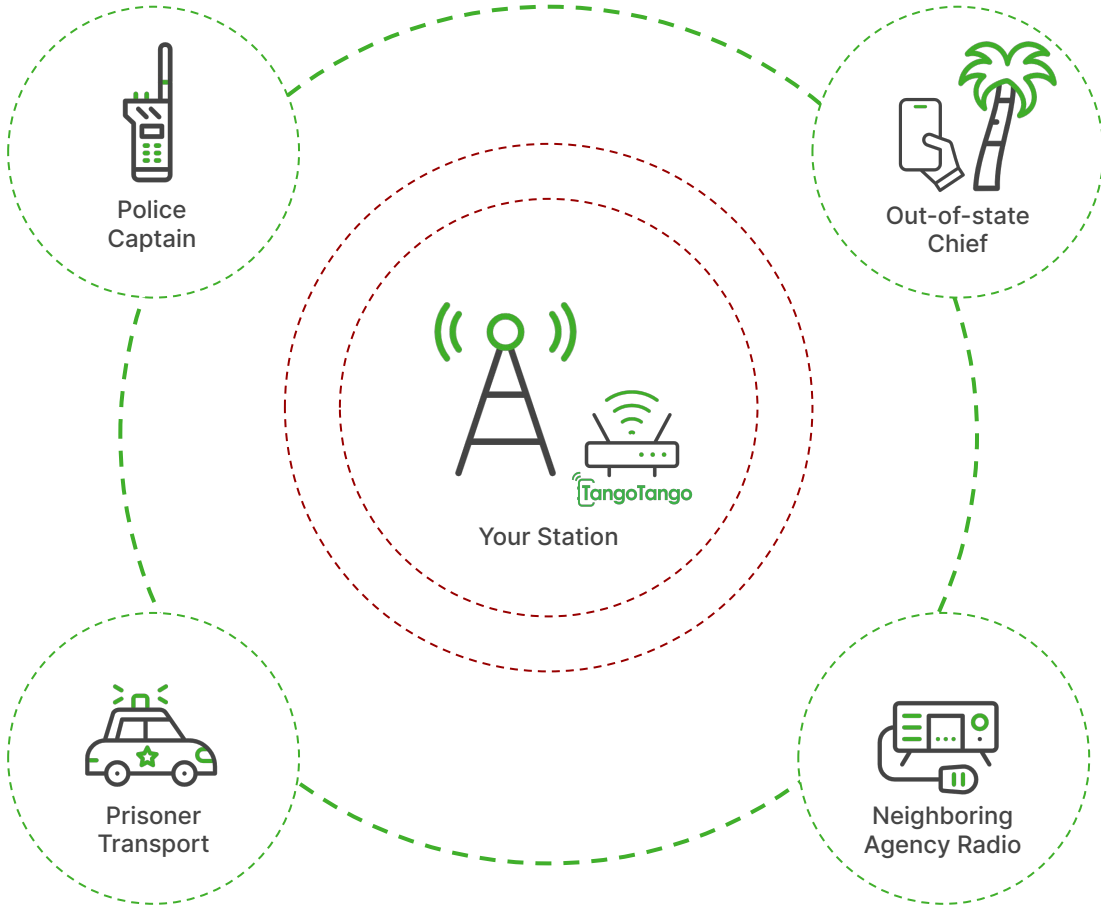

A Modern Solution For First Responders

Turn any phone into a radio.

Through our technology, we help improve the coverage and connection of your team easily, while helping you drive radio costs down. You are always connected, even without a radio.

Way more than just push-to-talk.

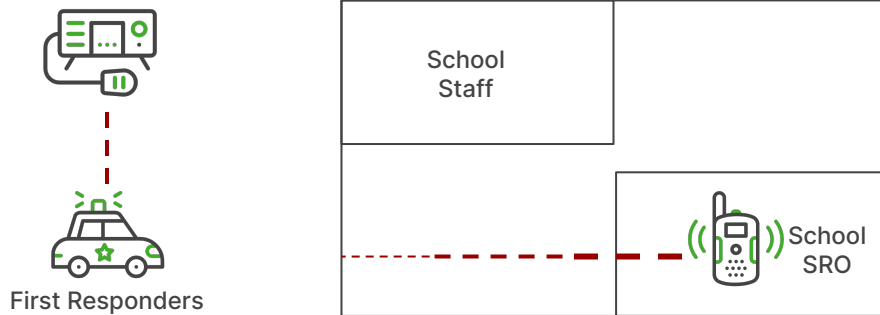

- One-to-One calling
- GPS tracking
- Secure & private encryption
- Emergency alerting
- Call & messaging logging
- Group texting

How Does It Work?

- Tango Tango easily connects to your existing radio system
- Our app allows your team to talk wherever there is cellular or wifi available
- Our service is device, frequency, and carrier agnostic
- Communicate with your team, even if you are out state
- Easily connect a neighboring agency for interoperability

How School Communication Works Now

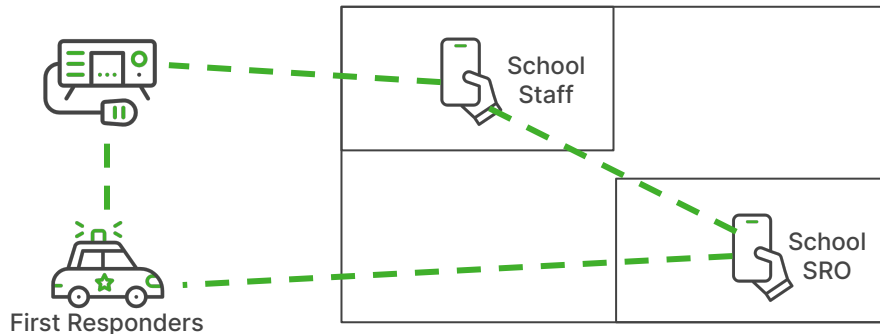

Use Case: School Safety

Without Tango Tango School Staff and Security has no clear line of communication between each other or first responders.

Tango Tango enables school staff, SROs and first responders to communicate critical information for the fast and effective resolution of emergency

“Tango Tango solved one main problem we had in communication with our SRO Officer while in the school. Reaching him by walkie talkie was out of the question until now.”

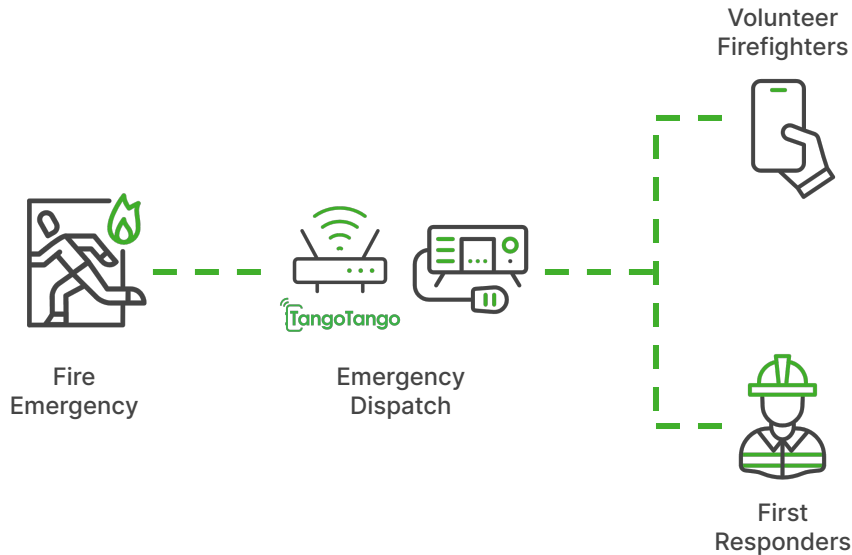

Communication with Tango Tango

Chief Barbour

Dadeville Police Department | Alabama

Everyone Stays Connected In The Event Of An Emergency

Use Case: Fire Emergency

Tango Tango provides access to all staff at a fire station, including volunteer firefighters.

Tango Tango enables firefighters, to call for assistance while on the scene, without the need for traditional radi

“Our jurisdiction encompasses a largely rural area, with many peaks and valleys, creating ‘dead spots’ which can become a serious hazard for emergency crews. TangoTango has solved that problem for us.”

What Our Customers Are Saying

“Due to Hurricane Michael, the state repeater was down, rendering our radios useless. [But] we were able to utilize Tango Tango to conduct our emergency communications via cellular phones.”

Mark Pergola - Captain

Seminole County Sheriff's Office | Florida

“Our personnel were able to stay in touch with each other and the radio system while locating the missing woman. TangoTango helped save her life as she was walking through hip-deep snow and was on the verge of hypothermia. We were able to locate her much quicker and effectively with the TangoTango.”

Wyatt Leesman - Asst. Chief

Blunt Rural Fire Department | S. Dakota

“TangoTango keeps our rescue team in constant contact with one another. The convenience of not having to carry a radio everywhere we go is outstanding. No matter where I go across the state my team is always just a push to talk away.”

Matt Locklear - Chief

Pembroke Rescue Squad | N. Carolina

Value Backed By Proof

Chilton County 911 needed to bridge their county fire teams on VHF together with their county law enforcement teams on digital.

After testing solutions from multiple providers who all fell short of getting everyone connected, Tango Tango was able to deliver a solution with the service and support they needed.

“It just works.”

Dan Wright

Executive Director of Chilton County 911 | Alabama

Our Value

- Provided easy interoperability for the county
- Integrated with current radio systems and drove radio costs down
- Connected analog and digital radio systems together across multiple agencies
- Provided top tier support and problem solving
